| fatemehmirzade.github.io

Research Interests

Large Language Models, Machine Learning, Proteomics, Artificial Intelligence.

Education

University of Antwerp

Antwerp, Belgium

PhD – Computer Science

Sep 2025 – Present

- Thesis: AI-Driven Metadata Annotation and Quality Control for Reproducible Mass Spectrometry-Based Proteomics Research

University of Tehran

Tehran, Iran

Master of Science – Mechatronics Engineering – GPA: 4/4

Sep 2022 – Sep 2024

- Thesis: Design and development of children's cry collection system using deep learning
- Courses: Artificial Neural Networks, Artificial Intelligence, Machine Learning, Analysis and Design of Deep Neural Networks

Shahid Beheshti University (SBU)

Tehran, Iran

Bachelor of Science – Mechanical Engineering – GPA: 3.44/4 (Last two years)

Sep 2017 – Aug 2022

- Thesis: Numerical study of the effect of infill on mechanical properties by Fused Deposition Modeling

Publications

Fatemeh Mirzadeh Sarcheshmeh, Ali Karimi, and Nayereh Rahmati. "A robust stacking ensemble of dual backbones and self-supervised pretraining for automatic fetal head circumference measurement." In: *Discover Artificial Intelligence* (2026).

Ali Karimi, Javad Seraj, **Fatemeh Mirzadeh Sarcheshmeh**, Abdoulreza Sajjadian Moosavi, and Masoud Shariat Panahi. "Improving spleen segmentation in ultrasound images using a hybrid deep learning framework." In: *Scientific Reports* (2025).

Awards & Honors

PhD Scholarship (Seal of Excellence)

Nov 2025 – Oct 2026

University of Antwerp, BOF

€58,000

- Competitive doctoral funding award in Computer Science/Bioinformatics

Master's Academic Award

2022 – 2024

University of Tehran

One-third tuition refund

- Awarded for highest GPA in Mechatronics cohort (4 semesters)

OBF Event Fellowship

Nov 2025

Open Bioinformatics Foundation

\$1,500

- Travel grant for ELIXIR BioHackathon Europe 2025, promoting open science & diversity

English Test Score

IELTS: Overall Score = 7, Listening = 8, Reading = 7, Speaking = 6.5, Writing = 6

GRE General: Overall Score = 334, Quantitative = 170, Verbal = 164, Analytical Writing = 4.5

Research Experience

Advanced Robotics and Intelligent Systems Lab

Research Assistant

University of Tehran

Jan 2023 – Aug 2025

Machine Learning Engineer:

- **Smart Device for Early Autism Screening:** Prototyped a Raspberry Pi-based smart device and implemented a fully automatic machine learning pipeline utilizing the YamNet model and advanced signal processing to acquire children's crying audio and perform early autism screening tests.
- **Ultrasound-based Intestinal Adhesion Detection:** Designed and implemented a deep learning pipeline to feature select and feature engineer ultrasound films segmented data for intestinal adhesion screening using YOLOv8 architecture and a custom semantic segmentation method.
- **Corneal Disease Classification System:** Developed a multi-branch network for Keratoconus disease classification using ResNet50, MobileNet, DenseNet, and Xception across 16 maps, achieving high diagnostic accuracy and identifying key discriminatory maps.
- **Advanced Spleen Segmentation Framework:** Engineered an AI framework for spleen segmentation from ultrasound images, integrating CGANs alongside UNET to enhance accuracy and automate measurement.
- **Image Similarity Detection System:** Employed Siamese Networks with Triplet and Contrastive Losses to refine image similarity detection. Achieved robust feature extraction, enhancing accuracy in image recognition, utilizing the People Dataset.
- **Speech Emotion Recognition System:** Designed a speech emotion recognition system using CNN-LSTM networks and signal processing techniques like MFCC extraction and data augmentation to aid people with alexithymia in recognizing emotions and improve human-computer interaction and mental health monitoring.

Faculty of Mechanical and Energy Engineering

Undergraduate Researcher

Shahid Beheshti University

Sep 2021 – Jun 2022

Python Developer:

- **Breast Cancer Tumor Analysis System:** Implemented feature extraction and feature selection methods on breast cancer tumor datasets, benchmarked various regression models, and designed a custom logistic regression model for optimized accuracy and performance.
- **Comparative Analysis of PSPNet and UNet for Underwater Monitoring:** Conducted a comparative analysis of PSPNet and UNet for underwater semantic segmentation and object detection to monitor the health of aquatic habitats.
- **Optimized VGG Architectures in Medical Imaging:** Optimized VGG11 and VGG16 using ImageNet and Medical ImageNet datasets, applying separation index in medical image analysis adaptation.

Teaching & Mentoring Experience

Adrem Data Lab

Teaching Assistant

University of Antwerp

Feb 2026 – Jun 2026

- **Computational Biology:** Computational Biology, De novo Peptide Sequencing, Python, Casanovo, Mass Spectrometry
- **Machine Learning:** Machine Learning, Neural Networks, Supervised classification, Python, Plotting, Data Analysis, Multivariate regression

Advanced Robotics and Intelligent Systems Lab

Teaching Assistant

University of Tehran

Sep 2023 – Jul 2024

- **Artificial Intelligence:** Python 101, Git, NumPy data manipulation, Multilayer Perceptron (MLP), Convolutional Neural Networks (CNN), Long Short-Term Memory (LSTM)
- **Neural Network:** PyTorch, Long Short-Term Memory (LSTM), Generative Adversarial Networks (GANs), Convolutional Neural Networks (CNN), Deep Learning Architectures, U-Net (including Encoder-Decoder architecture)
- **Medical Artificial Intelligence:** Python 101, Markov Models, Machine Learning Models

Faculty of Mechanical and Energy Engineering

Teaching Assistant

Shahid Beheshti University

Sep 2021 – Jun 2022

- **CAD/CAM:** SolidWorks, Abaqus

Selected Work Experience

CAD/CAM Engineer

Mechanical Engineer

Shahid Beheshti University

Feb 2022 – Aug 2022

- Benchmarked multiple topology optimization methods for stress/strain analysis using SolidWorks, Abaqus, and MATLAB.

English Teacher

Instructor

Safir Language Academy

Dec 2019 – Dec 2022

- Educated adult learners in English language skills.

Data Scientist

Researcher in collaboration with the University of Turku

Iran Migration Observatory (IMOBS)

Jul 2019 – Nov 2019

- Prepared the questionnaire and managed data collection processes.
- Utilized SPSS software for coding questions and answers to ensure system compatibility.
- Performed comprehensive analysis of the collected data to draw conclusions on the challenges faced by Afghan migrants in Iran and Finland.

Internship

Intern

University of Tehran

Jul 2018 – Sep 2018

- Focused on acquired skills in Pyomo for advanced Python optimization, mastering modeling, solver integration, and real-world problem-solving proficiency.
